

# Data, data everywhere...

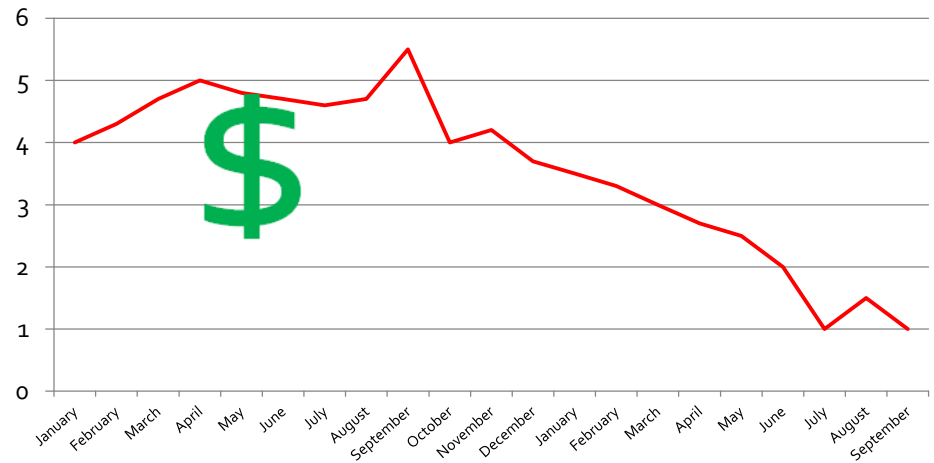

## Use of izi Population Health Management System

Chris Espersen  
Primary Health Care

# What are you struggling with?

## Operating Income Margin

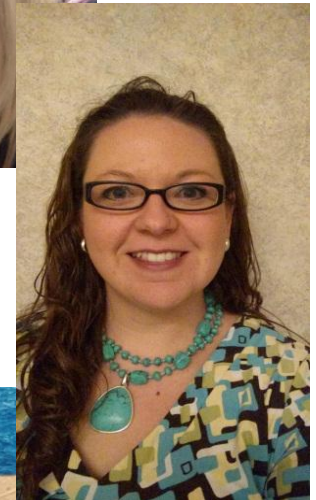

# Ease of Use

Maybe not easy enough for a baby to use, but pretty easy!

-Extremely easy to train new data AND clinical staff to use  
-CMO and front line staff use to manage complex patients

# Innovative & Actionable Analytics

- Automapped *or* customization
  - For low resource organizations can automap, for others, can track any data you desire without waiting for someone to build a report
- VI-SPADT (and everything *else* not in your EMR)
- Custom Data Integrator
- Timeliness
- Point of care integration

# Show Me the \$

- MU certified
- Pre-validated by NCQA for 2014
- ANY grant
- ANY population w/ value based payments\*\*\*
- Missed care opportunities

# Customer Service

- Fast and friendly
- There is a version upgrade for that
- “When it comes to all our data systems we inevitably have to use, izi has always given me the most accurate and actionable answer”

-CMO

# Thank you!

Questions, now or in the future?
