

# Quality Improvement for Homeless Patients: Infusing a Culture of Quality

Pooja Bhalla, RN, MSN and Jessie M. Gaeta, MD Boston Health Care for the Homeless Program

## Opening Discussion

## Agenda

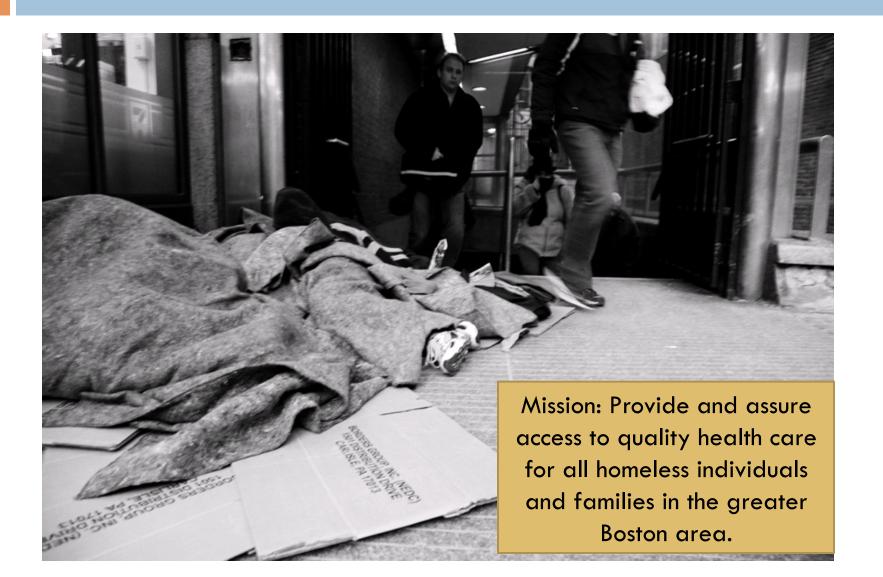

- Consider the evolution of the QI program at Boston Health Care for the Homeless Program (BHCHP)
- Describe steps to promote a culture of quality in clinical and administrative settings
- Provide a road map to assist in implementing and maintaining a quality improvement initiative through case examples

#### Outline

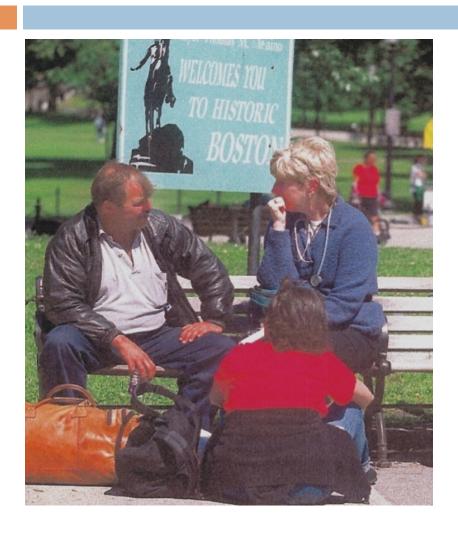

- BHCHP at a Glance
- Our QI Journey
- PCMH Risk Stratification
- PDSA Highlights
- Discussion Throughout

#### Boston Health Care for the Homeless Program

#### Care Model

- Person-centered/ comprehensive care
- Team-based/medical home model
- Culturally competent
- Highest quality

#### Clinical Sites

- Mass General Hospital
- Boston Medical Center
- Bridges, alleys, parks, and doorways
- Barbara McInnis House
- Pine Street Inn
- St. Francis House
- South End Fitness Center
- Casa Esperanza
- Kingston House

- Woods Mullen Shelter
- Shattuck Shelter
- Father Bill's Place
- Rosie's Place
- □ Women's Lunch Place
- □ Family Shelters + Hotels
- Dental Clinic
- New England Center for Homeless Veterans
- And more...

## Jean Yawkey Place

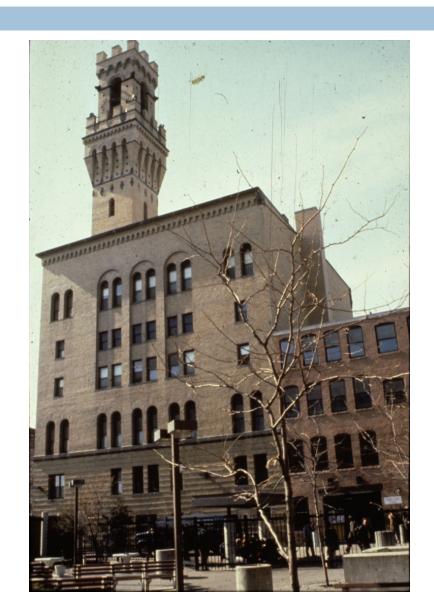

## **Boston Medical Center**

## Massachusetts General Hospital

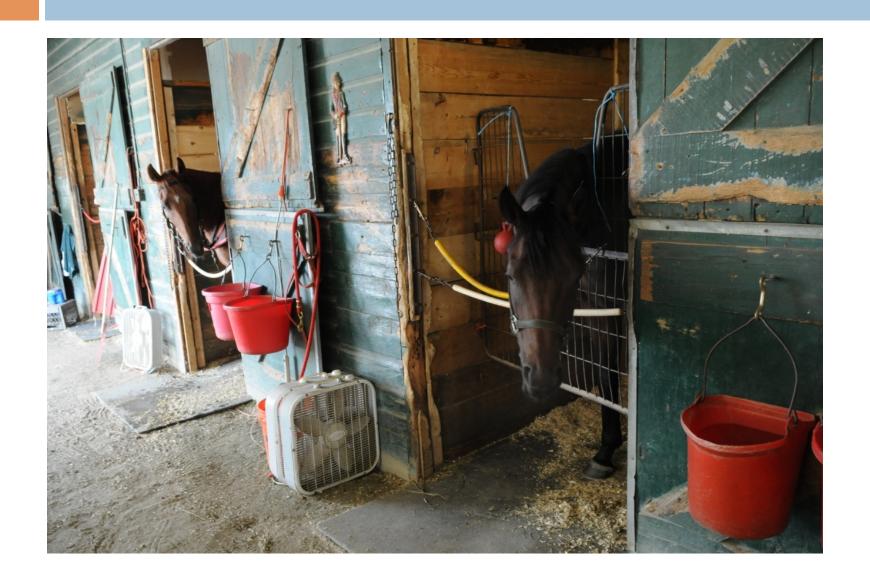

#### Pine Street Inn Shelter

## Family Team

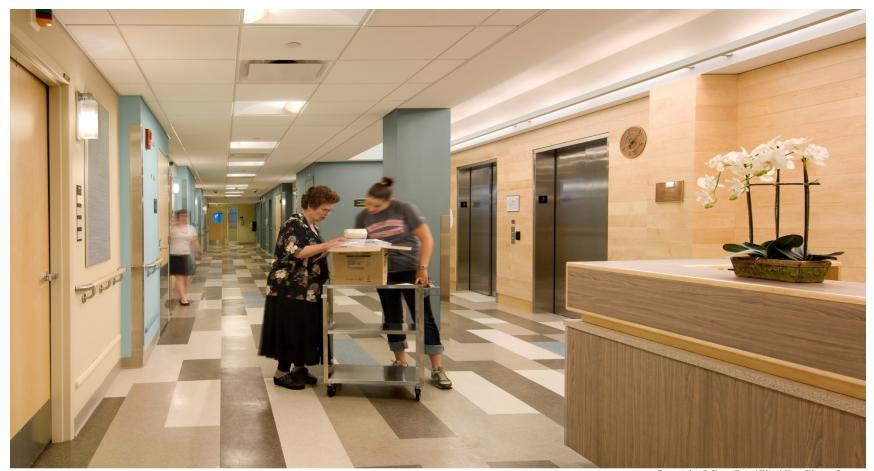

### Suffolk Downs Racetrack

## Street Team

## Barbara McInnis House

Copyright © Dan Gair / Blind Dog Photo, Inc.

#### Homeless Health Status

- Increased mortality
- Increased chronic medical illnesses
- Increased mental illness and substance use disorders
- Multitude of barriers to medical care
- Fragmented and crisis-oriented medical care
- Medical follow up is greatly lacking
- No sufficient place to recuperate

#### Patient Retention

- □ New: ~ 60% will not come back
- $\square$  Chronic:  $\sim 29\%$  will not come back
- What does this imply for:
  - Panels?
  - Required quality measures?
  - Design of service delivery model?

## Our QI Journey

#### QI Initiative

- Collection of data for baseline
- Recognition of need to improve
- Staff champion to take lead
- Team-based approach to care
- Motivation and incentives
- Clinical reminders
- Data reporting to individual clinicians
- Road shows

#### QI Initiative

- "Stall stats"
- Health and Wellness fairs
- CAB participation
- Monthly themes

## Program-Wide Quality Measures

Measure	Previous Results TY Sep 2014	GOAL 2014-2015 & Healthy People 2020 Target (HP 2020)	Current Results TY Dec 2014 % (N/D)
Cervical Cancer Screening:  Percentage of women age 21-64 who received one or more PAP smears in the past three years	50%	HP 2020 - 93% 60%	<b>51%</b> (1695/3307)
Breast Cancer Screening:  Percentage of women age 40-69 who have had a mammogram in the past two years	36%	HP 2020- 81.2% 45%	<b>37%</b> (670/1835)
Colon Cancer Screening:  Percentage of patients age 50 to 75 with appropriate screening for colorectal cancer	34%	HP 2020- 70.5% 40%	<b>34%</b> (1745/5176)
Hypertension Control:  Adult patients with a diagnosis of hypertension, seen at least twice in the last year, with most recent BP < 140/90	58%	HP 2020- 61.1% 61%	58% (1364/2364)
Diabetes Control:  Adults with a diagnosis of diabetes, seen at least twice in the last year with HgbA1C <9%	67%	HP 2020(A1C >9)- 16.1% 70%	<b>66%</b> (755/1151)
Tobacco Assessment and Intervention:  Percentage of patients 18 and older who have been seen for at least 2 medical visits, who were screened for tobacco use one or more times in the past two years AND who received cessation counseling intervention if identified as a tobacco user	97%	HP 2020: Tobacco Screening- 68.6% Cessation Counseling- 21.1% 97%	<b>97</b> % (5235/5377)

## Program-Wide Quality Measures

Measure	Previous Results TY Sep 2014 %	GOAL 2014-2015 & Healthy People 2020 Target (HP 2020)	Current Results TY Dec 2014 % (N/D)
Adult Weight Screening and Follow-Up:  Percentage of patients 18 and older who have been seen for at least one medical visit, who had a calculated BMI in the past six months or during most recent visit AND if the most recent BMI is outside of normal parameters, a follow-up plan is documented.	69%	70%	<b>72%</b> (6761/9383)
Coronary Artery Disease: Lipid Therapy:  Percentage of patients with a diagnosis of CAD prescribed a lipid lowering agent	48%	80%	<b>77%</b> * (102/132)
Ischemic Vascular Disease: Aspirin Therapy:  Percentage of patients with a diagnosis of IVD or AMI, CABG, or PTCA procedure with aspirin or another antithrombotic therapy	47%	60%	<b>44%</b> (191/435)
Asthma Pharmacological Therapy:  Percentage of patients aged 5-64 who have been seen for at least one medical visit with an active diagnosis of persistent asthma who were prescribed inhaled corticosteroid or an accepted alternative medication	42%	50%	<b>57%**</b> (407/716)
Depression Screening and Follow-up:  Percentage of patients aged 12 and older screened for clinical depression using an age appropriate tool AND follow-up plan documented if depressed.	YTD 45%	60%	<b>46%</b> (4627/1004 5)

## Team-Specific Quality Measures

Site/Team	Measure
Barbara McInnis House	Medication Error Rate to be less than .75 error/day
HIV Team	Annual PPD Screening for $75\%$ ore more of all eligible HIV patients
HIV Team	To retain 90% or more of patients seen in care
Behavioral Health Team	In 60% or more patients with an initial PHQ9 score of 15 or more, decrease PHQ9 score by 2 or more points or more
Dental Team	50% or more of HIV Team patients with annual dental visits for
Dental Team	55% or more of all dental visits to include Preventive Care
Dental Team	90% ore more of all dental visits to include Oral Cancer screening
Family Team	65% ore more of all children seen with completed immunizations

#### Value-Based Health Care

Value

Cost of care

### Focusing on the Value Argument

We need to identify where our programs add value:

What are our strengths?

How do we best apply these strengths?

Where do we add value to the health system?

## Multidisciplinary Approach

- MD/NP/PA
- □ RN
- Social worker
- Front desk staff
- Medical assistant
- Case manager
- Community health worker
- Each discipline should be working at their highest level

## Multidisciplinary Approach

- Quality plan
- Assign measures to each discipline
- Avoid duplication of responsibilities
- Get feedback from each discipline
- Celebrate and recognize improvements

## Multidisciplinary Approach

FDS: Update PCP

MA: Vital Signs, BMI

 Clinicians: Pap Smears, Mammograms, Colon Cancer Screening, CAD lipid therapy, Asthma management, BP control, Antibiotic for acute Bronchitis, etc.

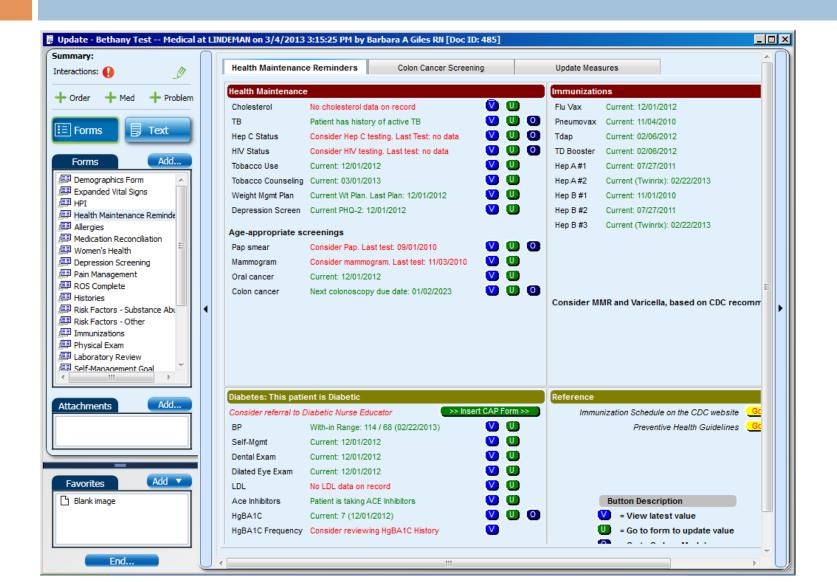

## Nursing Practice Standards

- Women's health measures
  - Pap smears, mammograms, FIT kits
- Tobacco screening and counseling
- Diabetes control
  - Finger sticks and HgbA1c

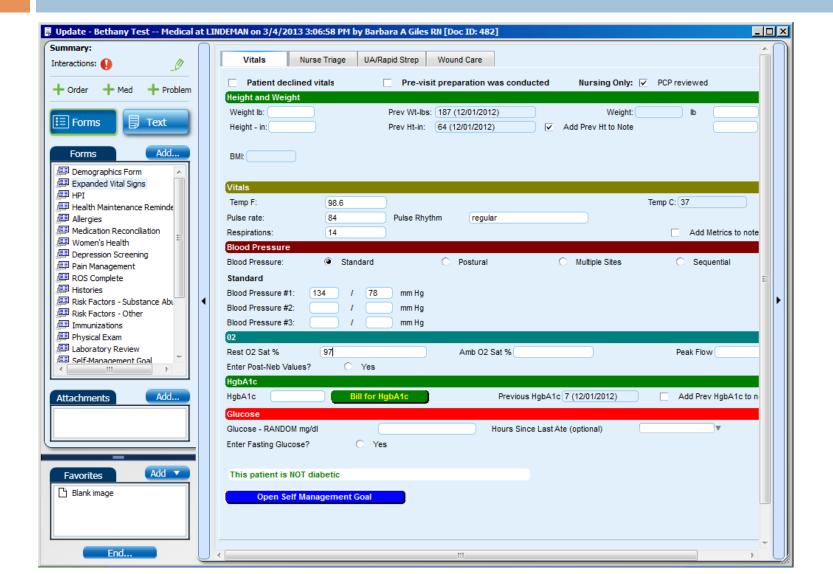

## Nursing Practice Standards

- Standing orders for immunizations:
  - Hepatitis A & Hepatitis B
  - Pneumovax
  - Flu
  - □ TB testing
- Standing orders for OTC's
- Clinical care management for high risk patients

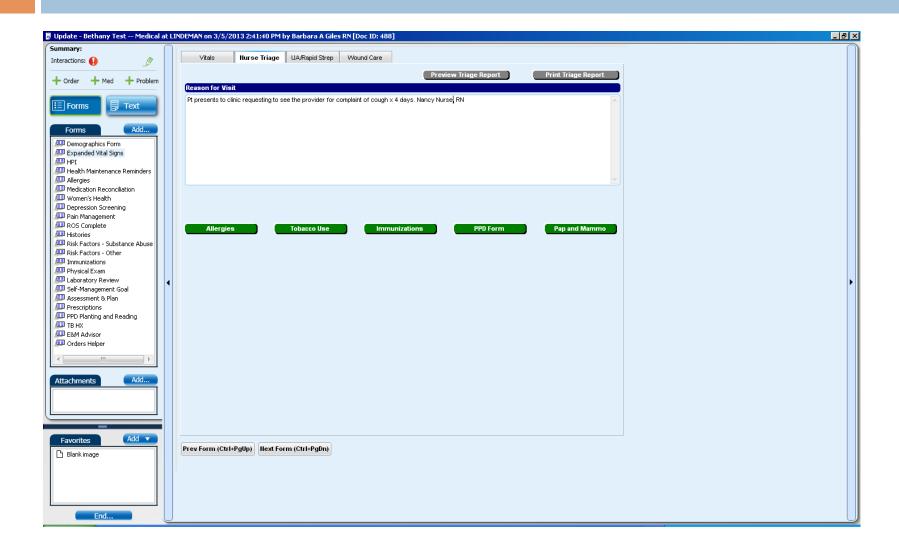

#### Health Maintenance Reminders

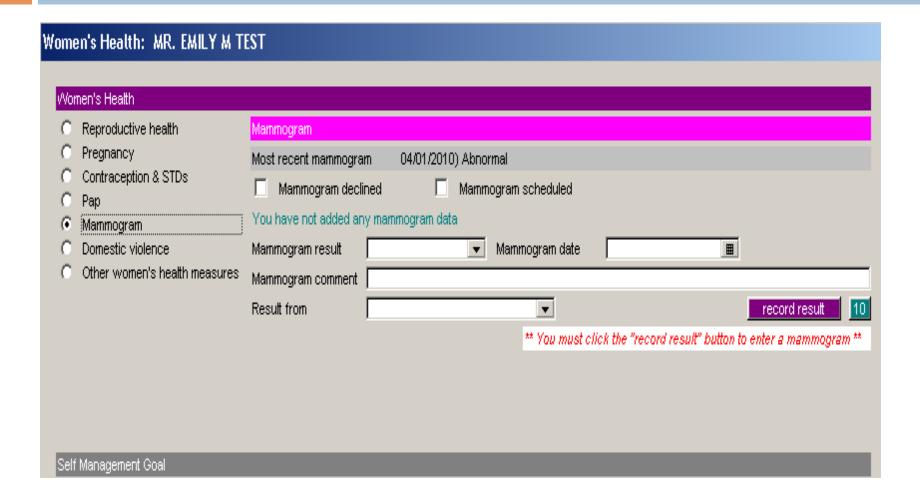

## Nurse Triage Form

Action Plan for QI from last quality meeting	Result/Feedback?
PAP days with Stacy/ sign up patients for PAPs	
Fun PAP appointment cards and reminders on pts. pillows	

### TY Sep 2014 Data Comparison to TY Jun 2014

Gains of more than 2%:	Losses of more than 2%:							
<ul> <li>Diabetics with A1C&gt;9 went from 76% to 84% (n&lt;50)</li> </ul>	IVD with Aspirin Therapy went from 54% to							
<ul> <li>CAD with Lipid Therapy went from 33% to 44% (n&lt;10)</li> </ul>	48% (n<30)							
Your site is at goal or exceeding program-wide goals in the following measures:								
1. Breast Cancer Screening								
2. Adult Weight Screening and Follow-Up	2. Adult Weight Screening and Follow-Up							
3. Tobacco Assessment and Intervention								
4. Diabetics with A1C<9								
5. Hypertensive pts with BP<140/90	5. Hypertensive pts with BP<140/90							
6. Asthmatics on Appropriate Meds								
Your site is within 5% of the program-wide goal in:								
Depression Screening and Follow-up								

### Areas for Potential Improvement:

- 1. Cervical Cancer Screening
- 2. Colon Cancer Screening
- 3. CAD: Lipid Therapy
- 4. IVD: Aspirin Therapy

# Action plan or areas of focus in quality improvement for upcoming quarter/year: 1. Stock pap supplies at clinic. 2. Have ready to use pap trays. 3. Get specula with built in light. 4. Use FIT to increase colon cancer screening rate.

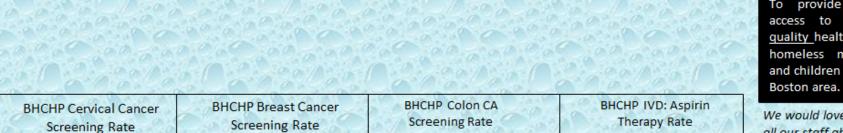

# Individual-Level Reporting

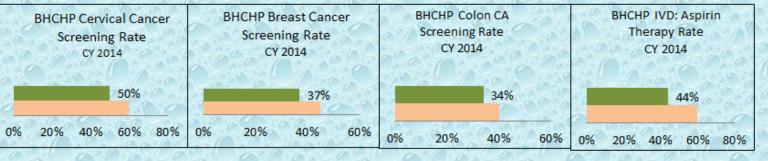

- Quarterly quality measures report (transparent!)
- Included in individual annual evaluations

# Other Quality Initiatives

## Stall Stats

### Our Mission:

To provide or assure access to the <u>highest</u> <u>quality</u> health care for all homeless men, women and children in the greater Boston area.

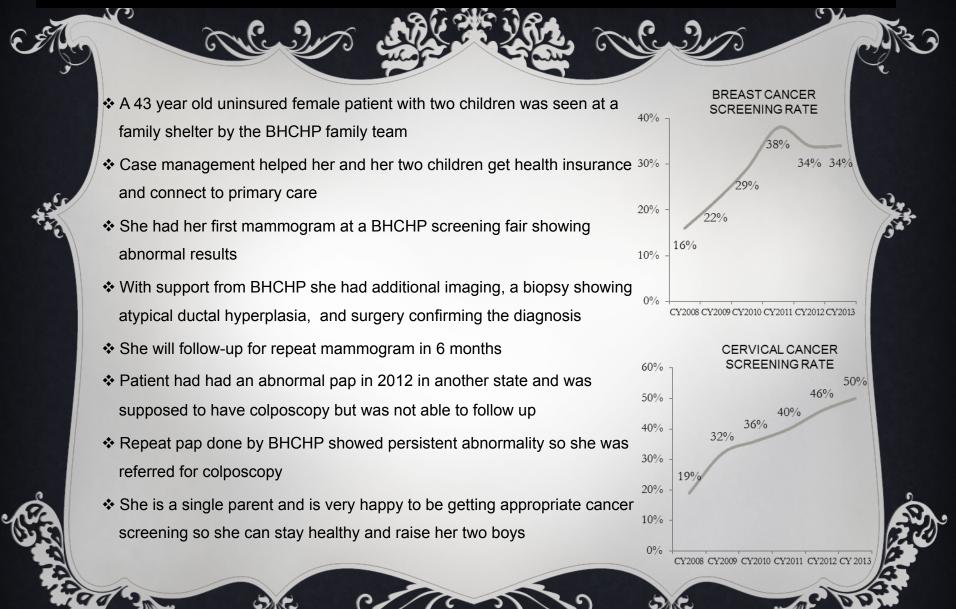

We would love to hear from all our staff about our continuous quality improvement efforts here at BHCHP and welcome any suggestions or feedback.

For More Information Contact: Monica Bharel MD, MPH; Chief Medical Officer mbharel@bhchp.org

# PCMH

**Risk Stratification** 

And

**Enhanced Care** 

### **PCMH**

- What is "Enhanced Care?"
  - The clinical model
- Who receives Enhanced Care?
  - Risk stratification
- Impact on quality

### What is "Enhanced Care?"

- More intensive services for patients at highest risk
- Clinical model includes:
  - Clinical Care Management by team nurses
  - Additional case management
  - Outreach capacity
  - Case conferencing
  - More involvement in care transitions
  - Integrated care plans (in progress)
  - Opt-out for behavioral health (future)
  - Prioritization for medical respite (future)

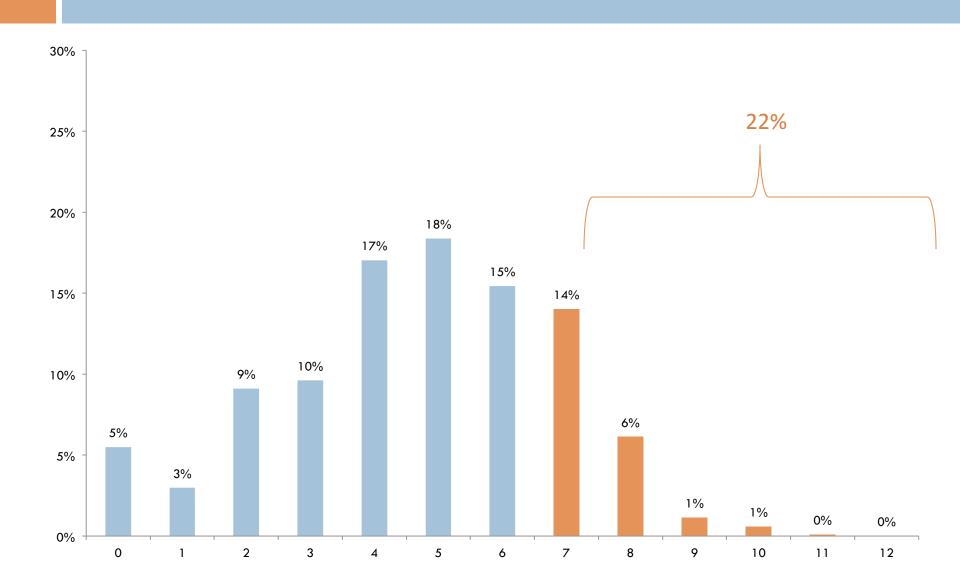

### Who receives Enhanced Care?

- □ High risk is defined in either of two ways:
  - Identified by insurer as high risk or high cost, as part of two Medicaid payment reform programs:
    - Primary Care Payment Reform
    - Duals demonstration project
  - High score on home-grown risk stratification tool

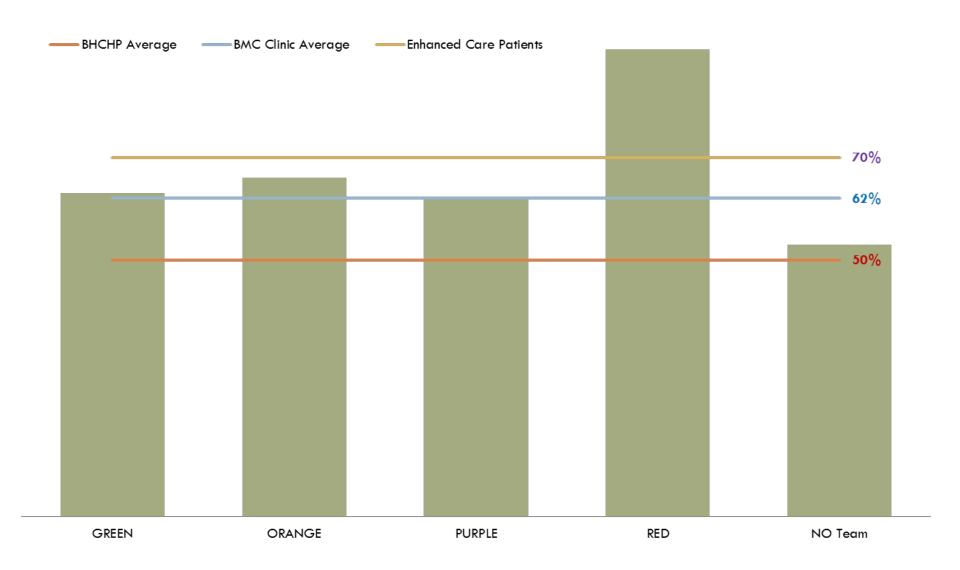

## Home Grown Risk Stratification Tool

Risk Category	Factors Included	Points possible	Point values
Medical Burden	Elixhauser minus Substance abuse and mental health diagnoses	3	0 – 0 diagnoses 1- 1 diagnosis 2- 2 diagnoses 3- 3+ diagnoses
Substance Use Disorders	Problem List, Drug Use History Form, Risk Factor Form, History of an overdose	3	<ul><li>2- Substance Use Disorder</li><li>3- History of an OD</li></ul>
Mental Health diagnosis	Anxiety, PTSD, depression, psychosis,		0 – no diagnoses
	dementia, cognitive impairment, personality disorder, adjustment disorder as documented by ICD9 codes	2	2 – one or more diagnosis
Utilization	Designation as High ED Utilizer	2	0 – Not a high ED utilizer
Exposure	Immersion foot		<ul><li>2- High ED utilizer</li><li>0 - no exposure diagnosis</li></ul>
	Hypothermia Frostbite	1	1 - any exposure diagnosis
Disability	Dual eligible	1	0 no 1 yes
	Total Possible Points	12	

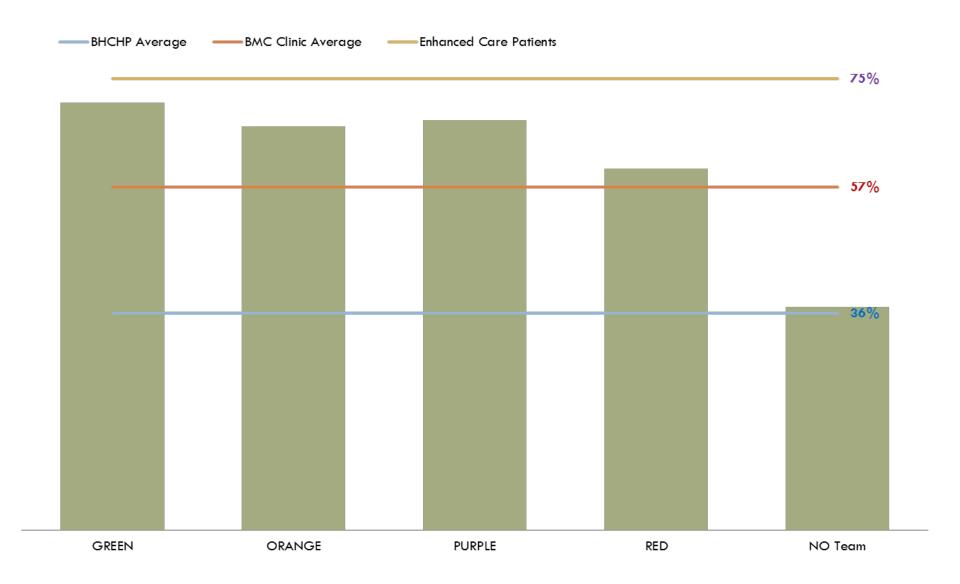

### Point Distribution

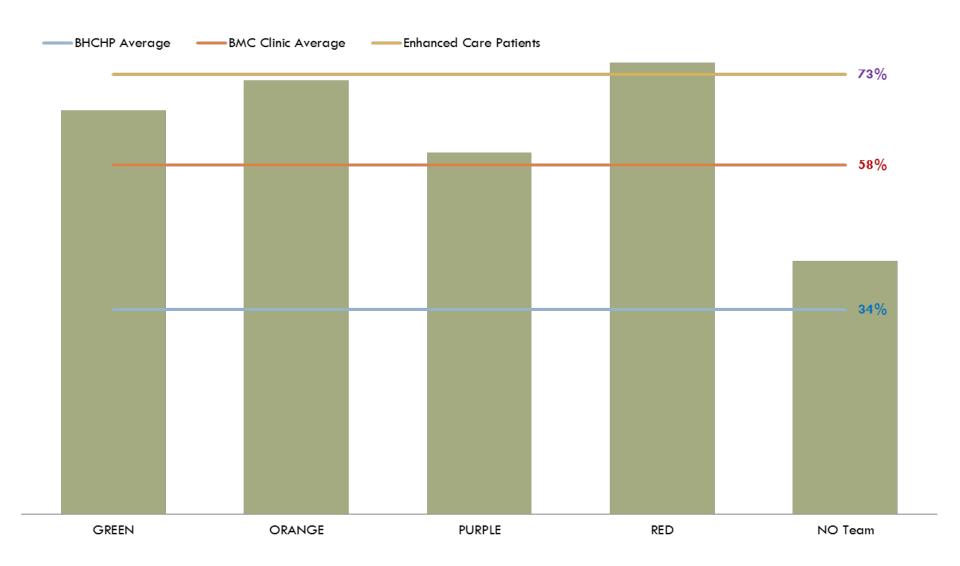

### BHCHP Cervical Cancer Screening Rate (TY Sep 2014)

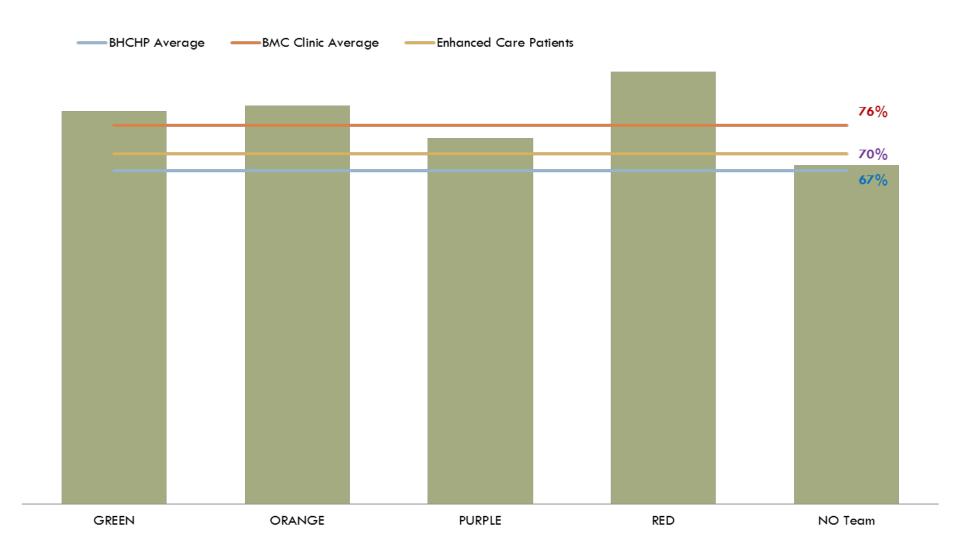

### BHCHP Breast Cancer Screening Rate (TY Sep 2014)

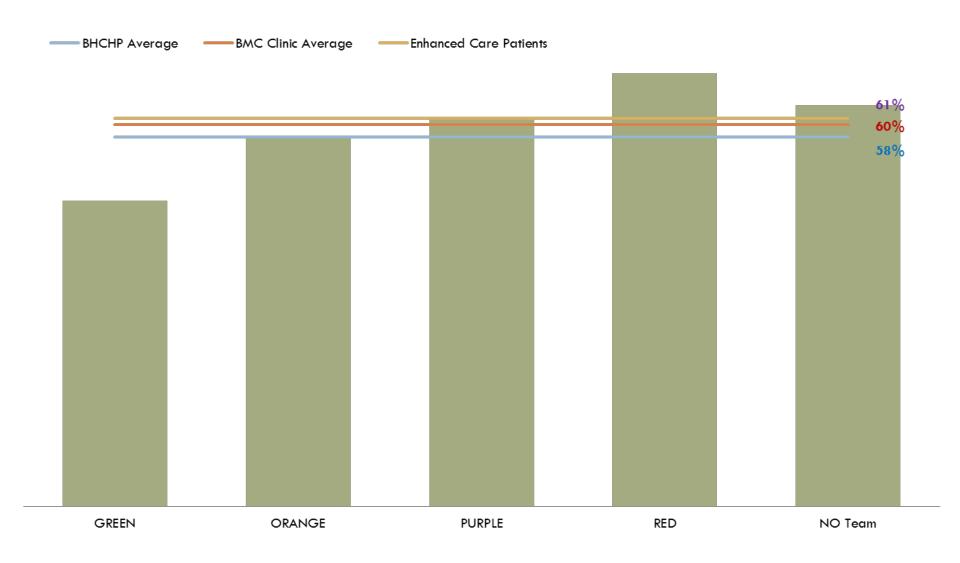

### BHCHP Colon Cancer Screening Rate (TY Sep 2014)

# BHCHP Diabetics with A1C<=9 (TY Sep 2014)

# BHCHP Hypertensive Pts with BP<=140/90 (TY Sep 2014)

# PDSA Highlights

# PDSA Samples

- Fecal Immunochemical Testing (FIT) for colon cancer screening
- 2. Oral health front desk process improvement
- 3. Pap project at BMC Clinic
- Improving the BMH patient admission process
- 5. Family Team "rock the doc" project
- Care Innovation and Transformation (ongoing)

# TRANSITIONING FROM GUAIAC- BASED FECAL OCCULT BLOOD TEST (GFOBT) TO FECAL IMMUNOCHEMICAL TEST (FIT)

# Setting the Stage

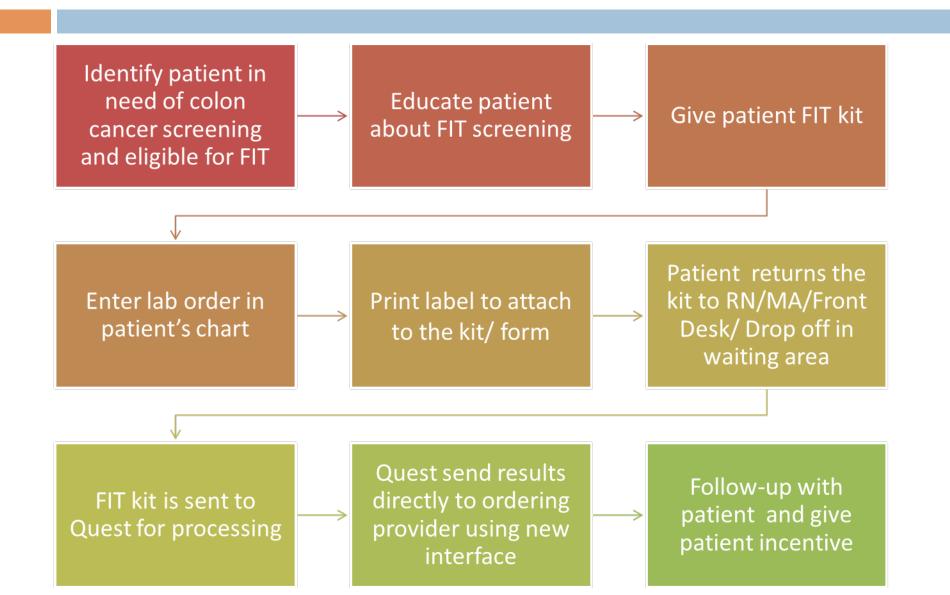

- Acquired a grant to improve colorectal cancer (CRC) screening
- Formed multidisciplinary work group
- Reviewed baseline data
- Proceeded to change our screening option from guaiac-based FOBT (gFOBT) to Fecal Immunochemical Test (FIT)

# Steps Taken

- Workflow evaluation including process mapping
- Updated policies and procedures
- Modified EMR to adapt to FIT
- Mailings/outreach to subset of patients
- Health Fairs
- Education! Education! Education!
  - Patient Education
  - Clinician Education
  - Site/Team Education

# Process Mapping

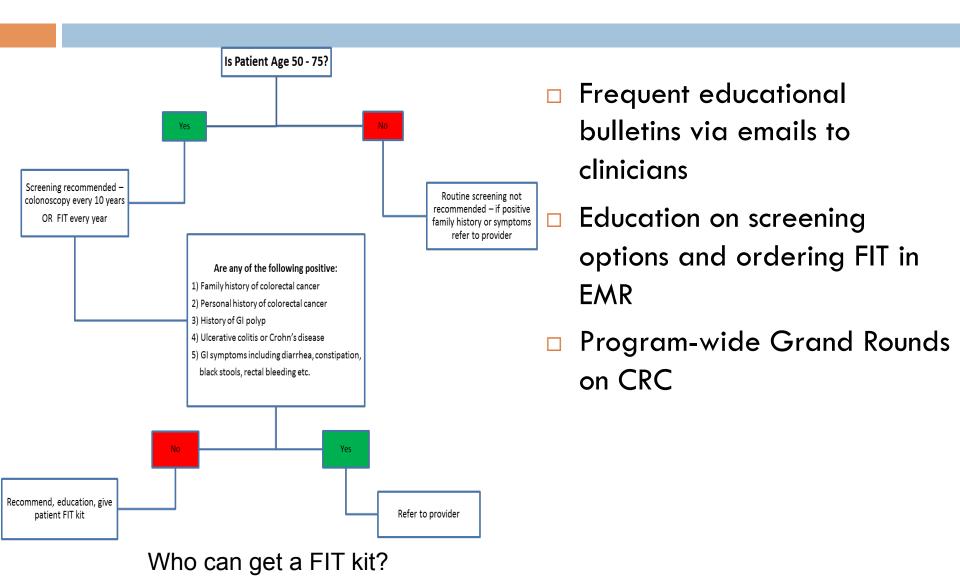

### Patient Education

- Interactive presentations at patient groups about CRC screening and FIT
- Design and distribution of culturally appropriate brochures and posters in multiple languages
- Patient incentives to complete test
- Tailored FIT instructional insert to simplify language/bilingual

### Clinician Education

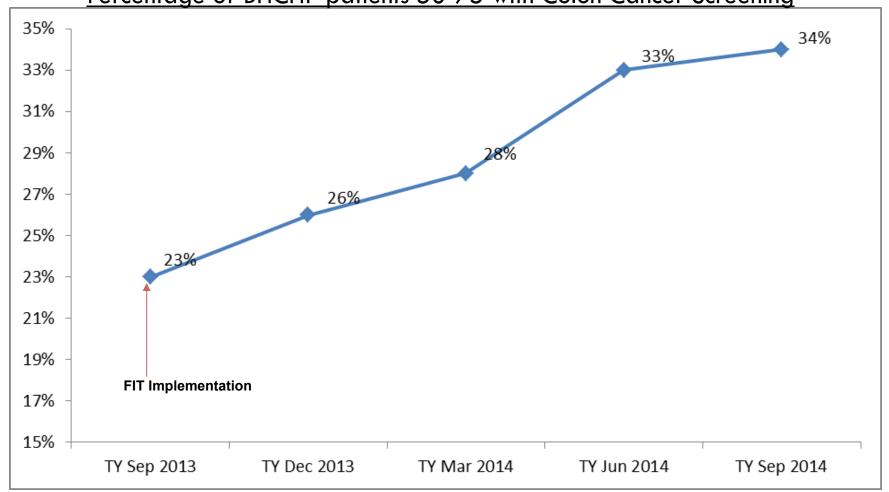

# Site/Team Education

- CRC work group members met with sites/teams
- Implementation through process improvement techniques
- Educational bulletin boards in high traffic areas
- Facilitated sharing of best practices

# Monitoring Progress

### Lessons Learned

- Communication
- Staff involvement and accountability
- □ Track progress
- □ Reminders and follow-up
- Celebrate success

# ORAL HEALTH FRONT DESK PROCESS IMPROVEMENT PROJECT

#### Project Charter for: Boston Health Care for the Homeless Program

#### **Problem Statement:**

• Patients and staff have decreased satisfaction with delays/confusion at the front desk. Staff are responsible for multiple processes at one time and are frequently interrupted.

#### Aim Statement:

• Our aim is to increase patient and staff satisfaction by improving efficiency and removing redundancies at the front desk.

#### Measures of Success:

- Improved scores on Customer / Staff satisfaction survey
- Reduced staff waste time
- Better distribution of front desk tasks over staff/time

#### Scope:

• All patient types, at JYP site, focused on front office processes.

#### **Boundaries:**

• FTE neutral, no capital expenses > \$500

Start Date: 2/26/14

Planned End Date: 6/11/14

#### Sponsor:

Monica Bharel

#### Facilitator(s) / Practitioner(s):

- Bessy Wrights
- Moselande Joseph
- Dana Thompson
- Colleen Anderson

#### Coach:

Antonia Blinn

#### **Team Members:**

- Indira Goranovic DA
- Maria Alves DA
- Tom Ricci, DDS
- Al Filzer, DDS

Sponsor Approval & Date

### Measure and Analyze: BHCHP

#### ·Hypothesis:

-All staff are responsible for same tasks, and have to do multiple tasks at the same time.

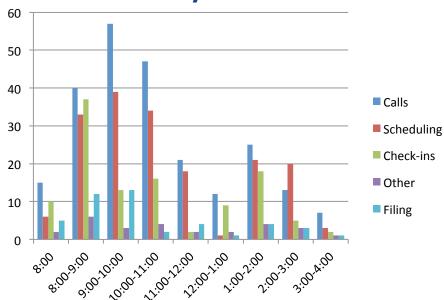

# •To understand possible root causes of the problem we:

- Conducted staff and patient surveys
- Completed 5 days of telephone logs
- Completed 8 days of observation

#### ·Findings:

- Staff have mixed responses to ease/stress of tasks
- Patient are largely satisfied, and unaware of staff frustrations
- Tasks all peak at the same time

#### **Results of analysis:**

#### Root causes identified:

- Heavy appointment schedule at that time
- Patient traffic heaviest in CHC at that time
- Lack of task division between staff members
- Lack of protocols for dealing with common situations

# Survey Results

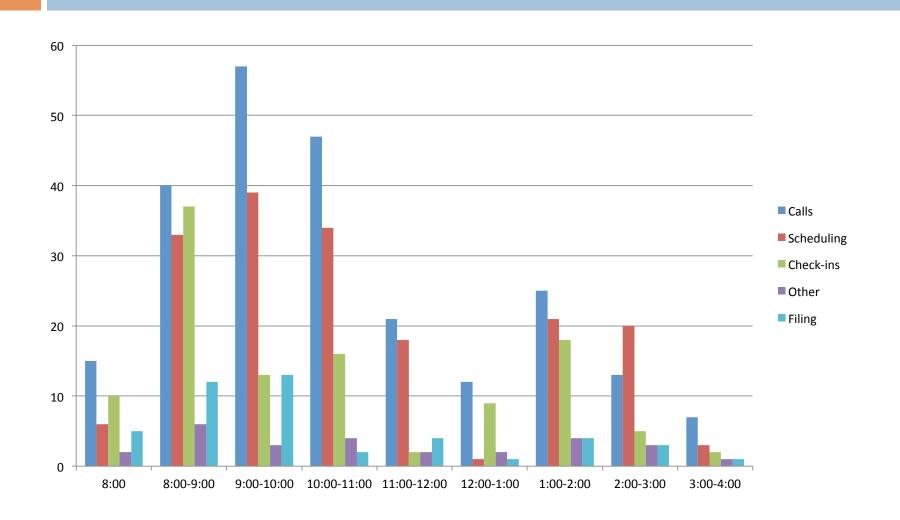

#### Staff:

- Mixed satisfaction, tends to dissatisfaction
- Find lack of protocols challenging
- Sometimes lack needed information
- Often/sometimes use work-arounds
- Report mild level of stress

#### Patients:

- Overall satisfied
- Most schedule in person
- Find staff courteous and helpful

### Everything Peaks at the Same Time!

# Improve

#### Ideas tested:

- Designated specific check-in and scheduling stations at front desk
- Divided tasks between two front desk staff
- Visual Management: Added signs and stanchion to guide patients
- Decreased missing information by enforcing existing protocol for providers

#### **Patient feedback:**

 Some confusion about desk designations at first, but otherwise positive

#### **Results from tests:**

#### Staff feedback:

- Overall positive
- •Some report it helps them focus; they like not feeling responsible for "everything"; feel more relaxed.
- •Staff became more comfortable over time, feedback has become more positive
- Noted it is easier to see deviation from or lack of protocols

Developed designated tasks (multiple iterations)

Developed more specific processes (ie: contact information)

Completed limited observations of time/ frequency of tasks to assess for better distribution.

# Desk Divisions and Visual Management

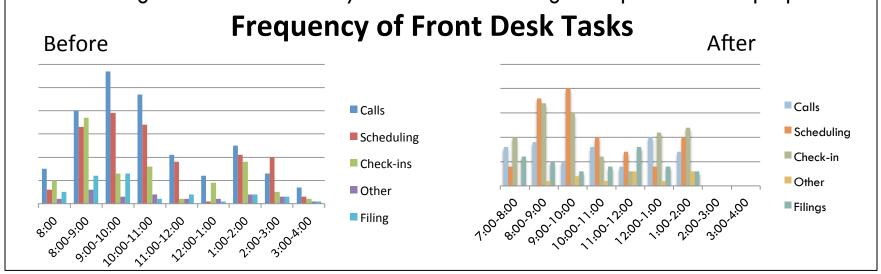

### Sustain

#### Our plan to sustain changes includes:

- Weekly huddle of assistants to touch base and address issues as they arise
- Periodic observations of front desk administration to monitor progress
- Periodic staff survey to evaluate satisfaction

Designated time at monthly dental team meetings for updates on QI projects

# Key Learning and Future Work

#### Key learning from this work:

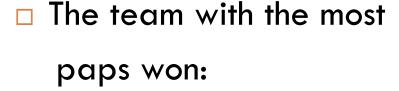

- It's important to not jump to solutions (this is hard to stop).
- Taking time to analyze problems leads to better solutions that are sustainable.
- Looking at things systematically allows us to focus on one area at a time.
- Communication with stakeholders is really important. Next time, we will devote more time early in the process to engaging the whole team.

#### Plans for future projects:

- Continue to standardize our front desk protocols.
- Evaluate other clinical operations for task division/standardization.

# Pap Project at BMC Clinic

- 1/3 of women not up to date with cervical cancer screening
- Team based PAP competition conducted
   from Aug 14th to Sep 30th

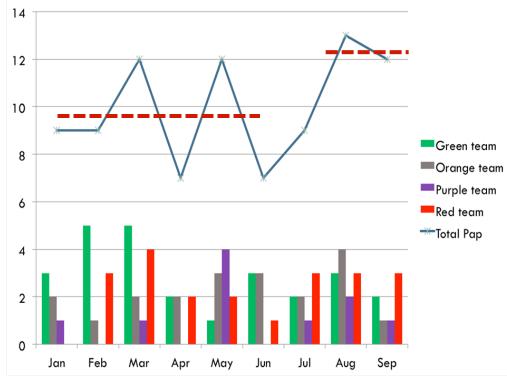

- Bragging rights
- Pizza case conference

Result:

	Jan 1 — Aug 13	Aug 14 – Sept 30
Pap rate	16%	21%*

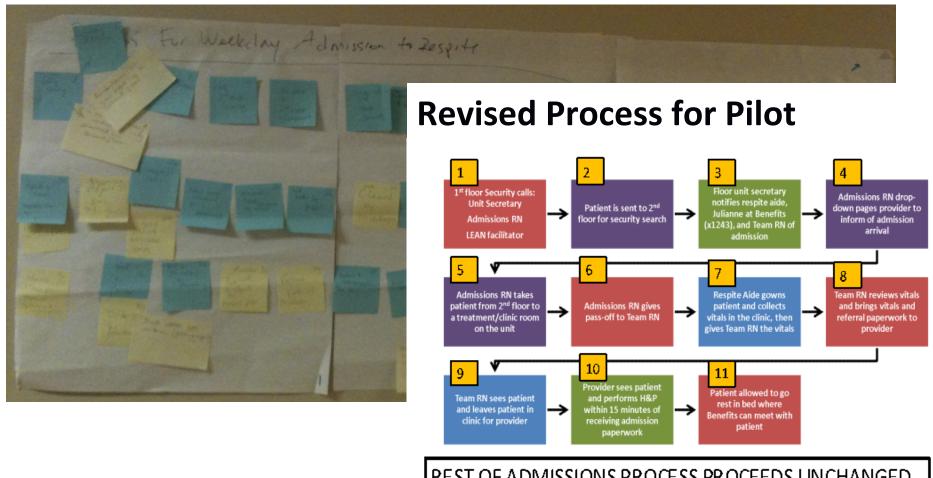

\*Chi squared p value: 0.16%

# Improving the Barbara McInnis House Patient Admission Process

**Original Process for Admissions** 

REST OF ADMISSIONS PROCESS PROCEEDS UNCHANGED

### PDSAs and Results

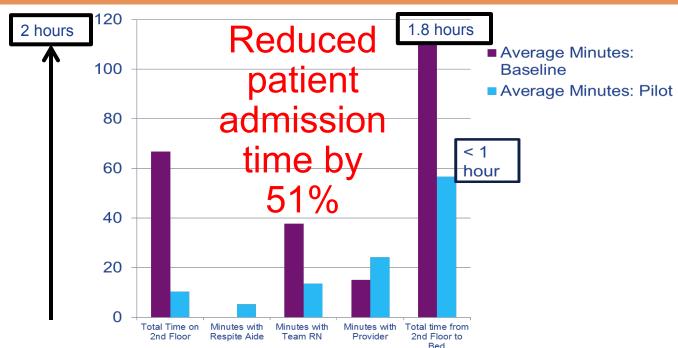

#### **Ideas tested:**

- Bring patient to unit floor immediately (no waiting on 2<sup>nd</sup> floor)
- Decrease the steps in the admission process

#### Patient feedback: (n=5)

- ☑"I prefer this admission process as I felt I was monitored the entire time."
- ☑"I think this way was more efficient"

#### Results from tests: 15 patient flow observations

# Family Team-Rock the Doc Project / DocSmart

Goal: Improve programmatic data collection and reduce time between opening and completing notes in EMR.

#### **Ideas tested:**

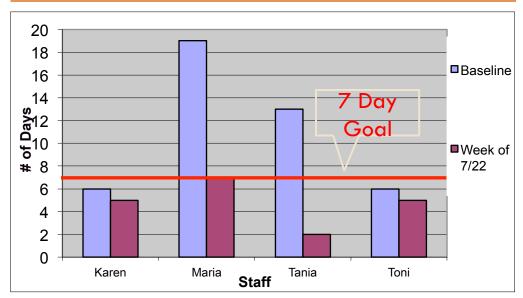

- Creating, use and revise standardized form for clinical staff
- Use of a planner/organizer for documentation
- Carve out of time for documentation
- Wear headphones when documenting in the office

#### Key learning from this work:

- Technology was not the solution!!
- Need for more practice structure and guides even in autonomous roles
- Working together helped the team find efficiencies and increased staff satisfaction
- Being pro-active and not reactive empowered staff

#### **Results from tests:**

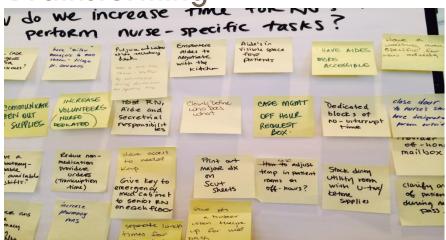

- A <u>structure</u> helps keep everything in the same place and makes documentation easier
- Blocking time is good, but it is not enough
- Some are feeling more organized and others are nervous about the loose papers
- Rest of staff is so excited to start using these new tools

### Care Innovation and Transformation

#### Frontline teams generate new ideas

**Brainstorming** 

#### **BMH** first Initiatives

- Introducing hard copy of vital signs for morning and evening vitals
- Respite Aide empowerment to make diet changes
- \* Admissions Huddles
- Chart Debulking

Low hanging fruit- Chose tests of change which we have high chance of succeeding first

- Clarifies the problems and identifies other problems that need to be solved first
- Provides further impetus for change
- Provides positive feedback further builds morale and motivation
- x Lessons learned help in planning the next goal
- Creates greater difficulty for resisters to block further change
- × Provides leadership with evidence of success
- Builds momentum helps draw the neutral or reluctant supporters

# Thank You
