

Program Team – Reasonable Accommodation for Persons with Disabilities**Policy**

Interfaith House is committed to serving ill and injured homeless adults in need of medical recovery. While we attempt to provide a comprehensive system of services within our programs, there may be individuals with particular physical disabilities that require services beyond our capabilities to improve their stay here. For these individuals, local agencies will be contacted to provide this support.

Procedure

1. Once a resident is identified as having a disability requiring further support than our staff is able to provide, the team member will make the referral to the appropriate agency within the Continuum of Care or within Chicago's mainstream system of services.
2. If possible, a linkage will be signed with the agency receiving our referral to facilitate continuity of care for this resident and others.
3. The resident will be supported through transportation and effective communication with the agency to ensure the delivery of services.

Michael Cook, Executive Director Date
