| <b><u>12:15-12:30</u></b> | Complete Learning Lab Evaluations   |

## **ACE's Learning Lab Reflection and Discussion Questions**

*For each topic, take a few minutes (3-5) to think and write down your own notes about your thoughts. Then discuss as a group for the remainder of the time.*

### **Small Group Discussion Topic 1:**

*How have you observed the impact of ACEs in your workplace (e.g. with patients, colleagues, community, etc.?) Also, describe any impacts on workplace outcomes (e.g. dynamics, quality of services provided, productivity).*

### **Small Group Discussion Topic 2:**

*Review the Trauma Informed Care Workplace Checklists. How does your workplace do in terms of implementing these best practices? In your view, what could be done to make significant improvements?*

### **Small Group Discussion Topic 3:**

*What are the most salient take-aways, new thoughts, or information that you gained today? What can you take back with you to immediately impact the way you approach your work or workplace?*
